DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1, 3, 5, 7-8 are rejected under 35 U.S.C. 103(a) as being unpatentable over Marshall et al. (USPN 4,800,131) in view of Ferree (USPN 4,719,330).

Marshall et al. discloses a welding wire having a metallic sheath enclosing a core wire and filler powder materials. Arc stabilizers are added to the composite wire, including graphite and potassium compounds. These types of materials are present in amounts of up to about 3.5% by weight of the total wire. Marshall does not teach the exact amounts and totals as instant claims.

Ferree discloses a flux core welding wire that contains carbon and potassium compounds. Amounts within the core vary from 2 to 12% based on the total electrode weight. It would have been obvious to one of ordinary skill in the art at the time of the invention to have amounts present of 2 to 12% as taught by Ferree in the Marshall et al wire because this is within the variation range of the weld core components.

The exact amounts of each of the constituents as presently claimed are not disclosed in the prior art; however, the prior art compositions closely approximate or overlap applicant's claimed composition. It has been held that one of ordinary skill in the art at the time of the invention would have considered the claimed compositions to have

been obvious because close approximation or overlapping ranges in a composition is considered to establish a prima facie case of obviousness. See *In re Malagari* 182 USPQ 549, *Titanium Metals v. Banner* 227 USPQ 773, *In re Nehrenberg* 126 USPQ 383.

Allowable Subject Matter

Claims 2, 4, 6 & 9 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The following is a statement of reasons for the indication of allowable subject matter: the prior art does not teach the presence of K_2MnTiO_4 and K_2SO_4 .
